TECHNICAL SKILLS

Languages: Swift, Dart, TypeScript, JavaScript, Solidity

Frameworks & Tools: Flutter, SwiftUI, Firebase, Supabase, REST APIs, Provider, GetX, SwiftData, WalletConnect, Git, GitHub, CI/CD, AWS(EC2, S3), React, Next.js, OpenAI API, Vercel, RevenueCat, ML Kit, Apple In-App Purchases, Apple Calendars, IPFS, Web3

EXPERIENCE

iOS Engineer

Nov 2025 – Present

MedQT [Mobile App]

Remote

- Developed a native iOS medical application enabling users to securely store, access, and manage **personal and family medical records** with real-time alerts and complete **AI Insights** about their health.
- Implemented **Apple Wallet integration** to generate **digital health passes** containing essential user information for quick access.
- Integrated **biometric authentication (Face ID/Touch ID)** to ensure **secure and seamless login** across user sessions.
- Enabled **In-App Payments** using Apple's payment framework, providing a **secure, native and frictionless transaction experience**.

Founding Flutter Engineer

Oct 2024 – June 2026

Domi Labs

Remote

- Developed and delivered **Flutter mobile applications**, implementing image scanning with ML, custom graphics and UI rendering using CustomPainter, real-time push notifications, and seamless in-app navigation with deep linking. [\[Mobile App\]](#) (US Region Only)
- Developed and delivered **Flutter Web App with CI/CD pipelines** using GitHub Actions and AWS S3, while reusing the state management logic across mobile and web to maximize efficiency and consistency. [\[Web App\]](#)
- Created a **custom cross-platform Design Package** maintaining visual and functional consistency across mobile and web applications.
- Established **scalable code practices** by introducing clean architecture patterns, modular feature organization, and GitHub Actions for automated testing and deployment.
- Built a **real-time chat feature using WebSockets**, enabling low-latency communication and interactive user experiences.

Flutter Consulting Project

Triumb

- Developed a **booking system** that allows users to seamlessly schedule and manage car wash appointments.
- Integrated **Firebase Firestore as a real-time database**, delivering fast, reliable storage and retrieval of booking and user data.
- Configured **push notifications**, to send booking confirmations, updates, and reminders, improving user engagement.
- Integrated **Razorpay payment gateway** enabling secure and seamless in-app transactions for services.

PROJECTS

Ziro Market (Website)

[Play Store](#), [App Store](#)(Test Flight)

Paper Trade, Heatmaps, Live Stock Market.

Flutter, Web-Sockets, Gemini AI, Supabase, AWS

- **Market-Wide Sector Analysis** : Visualized all major Indian market sectors through interactive heatmaps.
- **Portfolio Intelligence and Risk Insights** : Helped users track portfolio performance, sector exposure, diversification, correlation.
- **Market Discovery and News Impact** : Connected market news with affected stocks and sectors while surfacing top movers.
- **Paper Trading and Smart Watchlists** : Enabled users to test investment ideas with virtual capital and monitor custom watchlists with relative performance comparisons against market indices and benchmarks.
- **AI-Powered Market Insights** : Integrated AI-driven analysis and summarization features to help users quickly understand market trends, stock movements, and financial news through actionable insights.

Finora (AppStore)

Smart Finance Portfolio Solution

SwiftUI, Supabase, Gemini AI

- **Portfolio Tracking and Risk Detection** : Enabled users to monitor holdings, concentration risks, and receive diversification insights.
- **AI-Powered Market Analysis** : Leveraged AI models to fetch real-time financial data, news, and sentiment for actionable stock
- **Automated Rebalancing Suggestions** : Provided buy/sell/hold guidance with fair entry and exit price ranges to optimize portfolio
- **User-Friendly iOS Application** : Delivered a clean, responsive SwiftUI interface for seamless portfolio management on the go.

EDUCATION

JECRC University

BTech in Computer Science (8.1 CGPA)

Jaipur, Rajasthan
